Fesch General Cleaning Spray 500ml

GENERAL CLEANING SPRAY

FESCH GENERAL CLEANING SPRAY 500ml

It cleans the lining dust and dirt formed in the brake system.

Fesch Brake & Clutch Cleaner Spray cleans discs, drums, brake center cylinder, vices, springs and clutch parts in the brake system and prevents brake squeaking.

- It increases the holding ability of the brake.
- It cleans the solidified oil waste.
- It cleans without the need to remove parts.
- It provides high cleaning performance.
- It does not leave residue and trails.
- It does not contain acetone and silicone.

Usage Areas

It can be used to clean drum brakes, disc brakes, brake linings, brake callipers, brake shoes.

Usage Instructions

Before use, read the directions on the packaging and act accordingly. Usage:

- The aerosol should use at room temperature.
- Cover the painted and plastic parts that you do not want to apply.
- Shake before use.
- Spray 20 cm away and wait until its effect.
- Repeat the process several times in heavily soiled areas.
- Dry the pieces outdoors or dry them with a dry rag.
- You can use the spray 360 °.

FESCH

Fesch Multi-Purpose Lubricant Spray

MULTI POWER FORMULA

Fesch Multi-Purpose Lubricant Spray 400ml

It can be used as a corrosion preventer, lubricant, polisher, cleaner or rust remover on metal and rubber parts. It loosens the parts stuck due to rust by removing the rust and lubricating it. Prevents rust for a long time by protecting the surface from water and moisture, prolonging the life of the parts. Eliminates squeaking noises. It is suitable for use in passenger and commercial vehicles, agricultural and construction machinery, boats, generators and indoors.

Features

- Penetrates deep into rusted surfaces
- Provides loosen
- Easily penetrate
- Easy and effective apply
- Spreads and clings to surfaces very well.
- Removes water and moisture
- Penetrates to the congested areas and protects against external factors.
- Solves the jammed parts by rust
- Broad range of applications (Automotive and shipbuilding, electrical contacts, motors etc)
- Protects against corrosion.
- Expiry date: 3 years after production.

Fesch Rust Remover Spray - MoS2 Formula

ANTI-CORROSION TREATMENT

Fesch Rust Remover Spray 400ml MoS2 Formula

It is used to clean the rust that restricts the mobility of moving parts, which is formed as a result of oxidation of metal surfaces such as gears, bolts, hand tools, hinges, bicycle parts, motorcycle parts, keys and locks. When used, it lubricates by forming a thin film layer and delays rusting again. Does not damage plastic surfaces.

Provides long-term protection against corrosion.

Features

- Cleans all metal surfaces from rust
- Broad range of applications (the stuck nut, bolt, handtools, huntir equipments, bicycle and motorcycle parts, door and wardroi hinges and all metal surfaces.)
- Forms a film layer after removing the rust
- Delays the rusting.
- Does not harm any plastic components.
- Removes rust stains from all types of ferrous metals
- Helps the metal surfaces to resist to atmospheric corrosion
- Fesch Rust Remover Spray can also be used as a rust proofing agent on steel surfaces prior to any painting or coating.

FESCH

Fesch Liquid Grease Spray

Fesch Liquid Grease Spray 400ml

It is a high-pressure resistant, well-adhering, transparent lubricant. Thanks to its good adhesion and formation of a thin layer on the surface, it provides protection against rust and stops contact with water. It prevents the formation of sound.

It guarantees continuous lubrication, does not flow from vertical surfaces. Thanks to its very good adhesion, it lubricates for a long time even on vertical and upside down surfaces.

Provides long-lasting durability and extends lubrication intervals.

Features

- Temperature ranges: from -20 to 180 °C
- For operation conditions of high load & speed
- Reduces friction and wear under shock loads and eliminates squeaks
- Protects against rust and corrosion and resists water wash off
- Easy and effective apply
- Broad range of applications (Garden equipment, Door channels ,Latches, Springs, Coils, Brake parts, Machinery, Tools, Hinges, Screws, Material handling and conveying equipments, Chains and sprockets, Gears, Wire ropes & Cables, Winches)

FESCH

Fesch Silicone Spray

Fesch Silicone Spray 400ml

High quality silicone spray with good lubricating, separating and lubricating properties. Very good material compatibility and high temperature resistance.

It has optimal sliding and lubricating properties. It prevents sticking and abrasion. Eliminates unpleasant squeaking sounds.

It has very good temperature resistance from -50°C to +250°C. It is colorless, does not change color. It is particularly user-friendly and suitable for safe use. It is moisture repellent, e.g. Protects rubber parts before freezing. It provides very good care and permanent protection.

Features

- Anti-static effect
- Can be used as an installation aid, e.g. for hose connections
- Rubber parts are protected, do not become brittle and do not freeze
- Protects electrical contacts surface against moisture
- Prevents squeaks
- Preserves and insulates vehicle exterior and interior plastic, rubber and metal parts.
- Plastic parts retain a high-gloss finish
- Plastic details do not become brittle

FESCH MDF-Kit - Multipurpose instant adhesive 400ml & 200ml

FESCH MDF-Kit - Multipurpose instant adhesive 400ml & 200ml

It is a two component fast adhesive. The activator prevents the adhesive from being absorbed by the surface, increasing the adhesion strength and accelerating the adhesion. It is used for bonding wooden profiles, bonding MDF rubber, chipboard, plastic and rubber, repairing and fixing wooden parts.

How to Use FESCH MDF-KIT?

The surface to be bonded must be dry, clean, free from dust and oil.

Hold the activator approximately 20 cm from the vertical surface and spray for 4 seconds.

Then apply the Cyanoacrylate (adhesive) to the other surface.

Witness the perfect stickiness after 10 seconds.

The expiry date is 2 years from the date of manufacture. Production date and charge number are at the bottom of the box.

FESCH Spray Paint

Fesch Spray Paint 400ml

Thanks to the quality components it contains, it is a common product with a wide range of uses.

- Properties;
- Modified Acrylic paint,
 - High nitro-alkydal quality,
 - Fast drying,
 - Good spreading and adhesion,
 - Easy applicability,
 - High coverage,
 - Excellent durability.

Scope of Application: Can be used on wood, metal, eternite, aluminium, cardboard, paper, glass, stone, porcelain and most plastics.

FESCH

FESCH General purpose clear silicone 280gr

Fesch General purpose clear silicone 280gr

It is used for filling and waterproofing in windows, shower cabins, sinks, bathtubs, PVC, glass, metal, wood, sanitary installations and repairs.

Features

- Excellent Adhesion
- Fast drying
- High Flexibility
- Perfect Sealing
- Heat resistance -40°C to +150°C

Usage

- Cut the tip of the cartridge according to the application area.
- Insert the cartridge into the gun.
- The application area must be dry, clean, free from dust and oil.
- During the application, the ambient temperature should be between -10°C and +60°C.
- Wait at least 48 hours after application for full performance.

Attention

Keep out of reach of children. Avoid contact with eyes, mouth and skin. In case of contact with eyes, rinse with plenty of cold water. Work in ventilated areas.

FESCH Silicone Sealant 450gr

FESCH Silicone Sealant 450gr

Color: White and Different Colors

Features

It does not crack, does not turn yellow, is resistant to the effects of aging.

Resistant to detergents, cleaning materials and chemicals.

It can be applied in all seasons.

Remains permanently elastic after curing.

Provides excellent adhesion to non-porous surfaces.

One-component ready-to-use

Permanently elastic

· Resistant to weather, UV and abrasion conditions

Scope of application

· Generally in glass fitting and assembly works.

For insulation and filling purposes in door and window openings.

· Applications in bathrooms and kitchens and in plumbing works.

· Insulation of electrical materials, sockets and switches.

· Applications in bathrooms and kitchens and in plumbing works.

FESCH

Fesch POLYURETHANE FOAM 750ml

Fesch POLYURETHANE FOAM 750ml

Excellent mounting property and stability, no shrinkage, no mildew and waterproof, high filling capacity, using mounting blocks with gun and straw. There are formulations specially developed for summer and winter conditions.

It is used in the assembly of doors and pender boxes, sealing of gaps, large cracks and holes, insulation of electrical sockets, drain and soq water pipes.

Usage

- Spray by holding the product upside down.
- Attach the pipette to the tube.
- The application area must be dry, clean, free from dust and oil.
- During the application, the ambient temperature should be between -10°C and +60°C.

Attention

Keep out of reach of children. Avoid contact with eyes, mouth and skin. In case of contact with eyes, rinse with plenty of cold water. Work in ventilated areas.

FESCH ACRYLIC BOX TAPE / 45mm x 100m / Transparent

FESCH ACRYLIC BOX TAPE / 45mm x 100m / Transparent

Acrylic duct tape, which is the most ideal to use for filmed surfaces, resists up to high temperatures. It is suitable for tape dispenser use as it does not break easily by hand like other duct tapes. It is produced transparently. Although it is suitable for use in light box and parcel packaging, it is mainly used in nylon packaging. These products, which have fast adhesion and strong grip, are priced slightly higher than normal duct tapes. Choosing the right packaging tape for the application area is very important for the presentation, protection and safety of your product. Acrylic Packing Tape is ideal for application in low or high humidity conditions. It also has a very strong resistance to oxidation and ensures that it is not affected even if it is exposed to sunlight. It is often referred to as packing tape. It offers long-term storage at variable temperatures and also performs the carton sealing process.

Especially on nylon surfaces, it is more efficient than boxes or cardboard. It is more convenient to use a duct tape machine as it does not break easily by hand. You cannot print on these tapes.

Acrylic Packing Tape Features and Usage Areas

Thanks to its water-based acrylic glue, it does not turn yellow. It is suitable for use at low and high temperatures. It has high resistance against external environments. Color options are not many. Transparent, tan, opaque, white and colored options are the most preferred.

Acrylic duct tape types are also very suitable for use in bonding products made of different materials. The tapes, which have instant adhesion, do not come off easily. In this way, you will have the opportunity to safely store boxes or packages for a long time. The products are produced in the desired width and size. When you take a look at the model range, products measuring 45 x 100 will be your favourite. It has been determined that it is 45 mm wide and in suitable conditions for standard box dimensions. The 100 m length is ideal for intensive use.
